

Fatih GENÇ

Frontend Developer

✉ fathgnc.dev@gmail.com ☎ +90 (555) 892 77 66 🌐 GitHub 🔗 LinkedIn 📍 Manisa, Turkey

Summary

Frontend Developer with 3.5+ years of experience building scalable web applications using React, Next.js, and TypeScript across SaaS and enterprise environments. Experienced in developing products from scratch, collaborating with cross-functional teams, and delivering secure, responsive, user-friendly applications with a mobile-first approach. Also experienced in ai-assisted development especially with Claude Code and Cursor.

Experience

Frontend Developer, MLPCARE

01/2026 – 02/2026 | Istanbul (Remote)

- Started building a responsive web application from scratch enabling hospital staff to create, track, and manage purchase requests, using Next.js and TypeScript.
- Implemented application state with Zustand and integrated REST APIs via React Query for efficient data fetching and caching.
- Leveraged the company's internal component library to build consistent enterprise interfaces.
- Collaborated with backend engineers and designers in an Agile team, using Azure DevOps for task tracking and GitHub Actions for CI/CD.

Frontend Developer, Adsby

01/2024 – 07/2025 | Istanbul (Remote)

- Led frontend development of Adsby [↗](#), an alternative advertising platform to Google Ads with paid plans, built from scratch with React and TypeScript to simplify complex ad-campaign workflows.
- Managed global application state with Redux and Zustand across separate projects, and integrated REST APIs using RTK Query and React Query.
- Integrated a role-based authorization system so different user roles could access only the features relevant to their permissions.
- Integrated stripe-based subscription system.
- Used chart.js to display charts and graphs to provide visual metrics to users and motion.js to create smooth animations.
- Monitored application performance and error logs with Sentry and New Relic
- Contributed to deployment and CI/CD workflows to help maintain reliability.
- Heavily used Notion for task management and project tracking.
- Partnered closely with UX/UI designers and backend engineers to translate designs and business requirements into production-ready features.
- Participated in feature planning, screen design discussions, and translating business requirements into frontend solutions.
- Built landing pages with Next.js.
- Worked in a fast-paced, agile development environment.

Frontend Developer, Codeventure Bilgişim

06/2022 – 01/2024 | Istanbul (Remote)

- Helped build a Twitter-like social platform used for real-time communication over a period of 1.5 years using React in conjunction with other modern web technologies.
- Worked heavily on frontend with React, TypeScript to create interactive and easy-to-use interfaces.
- Built a real-time chat feature using socket.io that supports both group chats and private messages for smooth user communication.
- Created important features like a news feed where users can post, comment, and interact with each other, plus a robust permission system to control what different users can do.
- Built backend services using Node.js, Express, and MongoDB.

- Handled task management via GitLab.
- Worked in an agile environment which included daily meetings and sprint plannings.

Backend Developer Intern, Codeventure Bilişim 01/2022 – 06/2022 | Istanbul (Remote)

- Used Node.js, MongoDB, Express.js in conjunction with the Factory design pattern.
- Created an accounting app based on requirements.

Education

Bachelor's Degree: Software Engineering, Manisa Celal Bayar University 06/2022 | Manisa
GPA: 3.48
